***Allowable Subject Matter***

1. Claims 1-22 are allowed.

Independent claims 1, 9, 13, and 20 are related towards a method of decoding a video signal and recite "...decoding at least a substantial portion of said encoded video data in an MPEG decoder and outputting a decompressed video data; performing a DC computation operation to determine an intra-dc- precision level from said decompressed video data; and, if said intra-dc-precision level is less than a first predetermined threshold determining that said decompressed video data being processed corresponds to an intra-coded picture..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 2-8, 10-12, 14-19, and 21-22 are allowed for the reasons concerning the independent claims.
